Executive Summary

Thank you for your interest in DefendX Software Mobility™. The latest addition to the DefendX Software product portfolio, DefendX Software Mobility enables employees to archive files; users can select from a predefined set of criteria such as file size, age of last access, or other criteria (Right-Click Data Movement™), and organizations can also establish policies that automatically archive files once users reach their storage limits (Event-Driven Data Movement™). Both methods enable companies to control storage and operating costs and to expedite backups by moving files from a primary storage environment to lower-cost tiered storage.

DefendX Software Mobility, in its simplest form, moves the contents of a file to a storage medium and leaves behind a stub to identify where its contents are located so the file can later be restored by DefendX Software Mobility. This gives customers the ability to reduce storage requirements by providing old files only when needed.

Requirements

This section highlights the main hardware and software requirements needed for a successful installation of DefendX Software Mobility File Intranet.

Hardware Specification

Your hardware should be appropriate for the services running on the machine. If the system is used only for file and print services, DefendX Software recommends the following:

- 1 GHz CPU
- 1 GB RAM
- 10 GB free disk space

Software Specification

Each DefendX Software Mobility File Intranet server must be running:

- Microsoft Windows® Server 2008 (SPn and R2), 2012 or 2012 R2
- Microsoft .Net 2.0 Framework
- Microsoft Internet Information Services (IIS 7 or 8)

NOTE: If you did not choose to install Windows Authentication, then you must manually enable anonymous access to the DefendX Software Mobility File Intranet web site after the installation is complete.

- Microsoft Active Server Pages (ASP .Net)

Browser settings

- Enable "META-REFRESH" under **Properties > Security > Local Intranet > Custom Security**. This may require you to add the DefendX Software Mobility File Intranet web server to your local intranet sites. If this setting is disabled then the DefendX Software Mobility File Intranet web site may not appear after double-clicking on an HTML or URL file stub.
- Disable **Protected Mode** under **Properties > Security**. If this setting is enabled then double-clicking on URL file stubs may result in a blank web page and the DefendX Software Mobility File Intranet site will not appear.

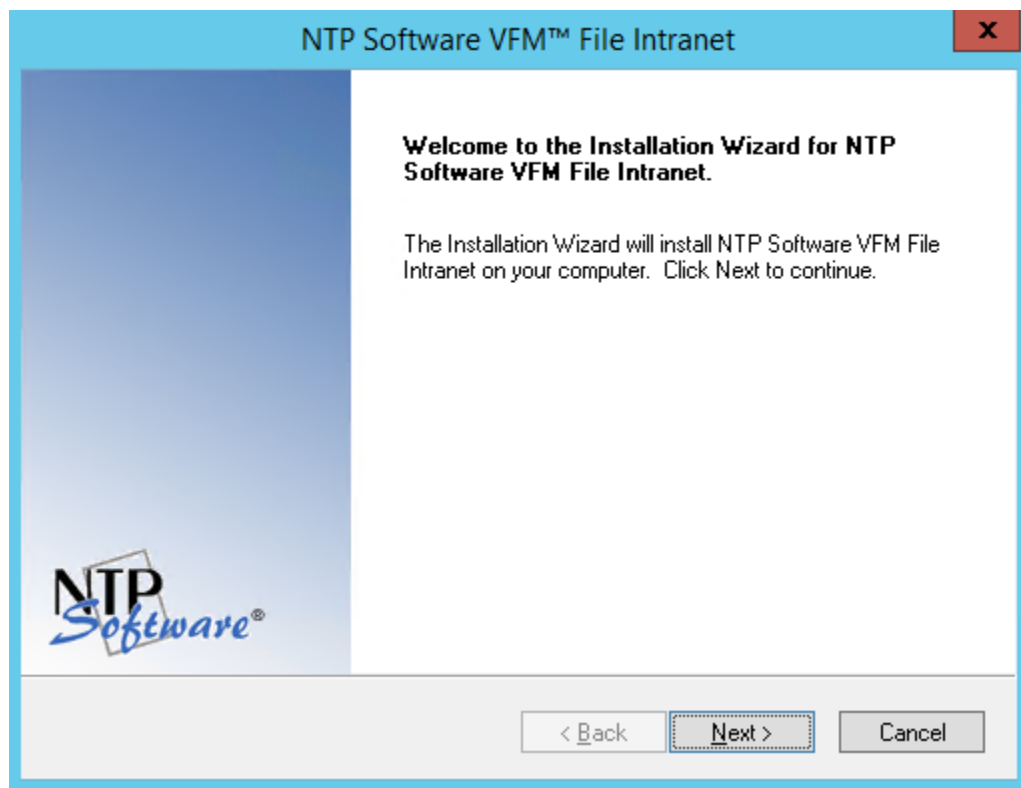

Installation

Prior to installing DefendX Software Mobility File Intranet, DefendX Software recommends verifying that the installation server meets the requirements listed in the *Requirements* section of this document.

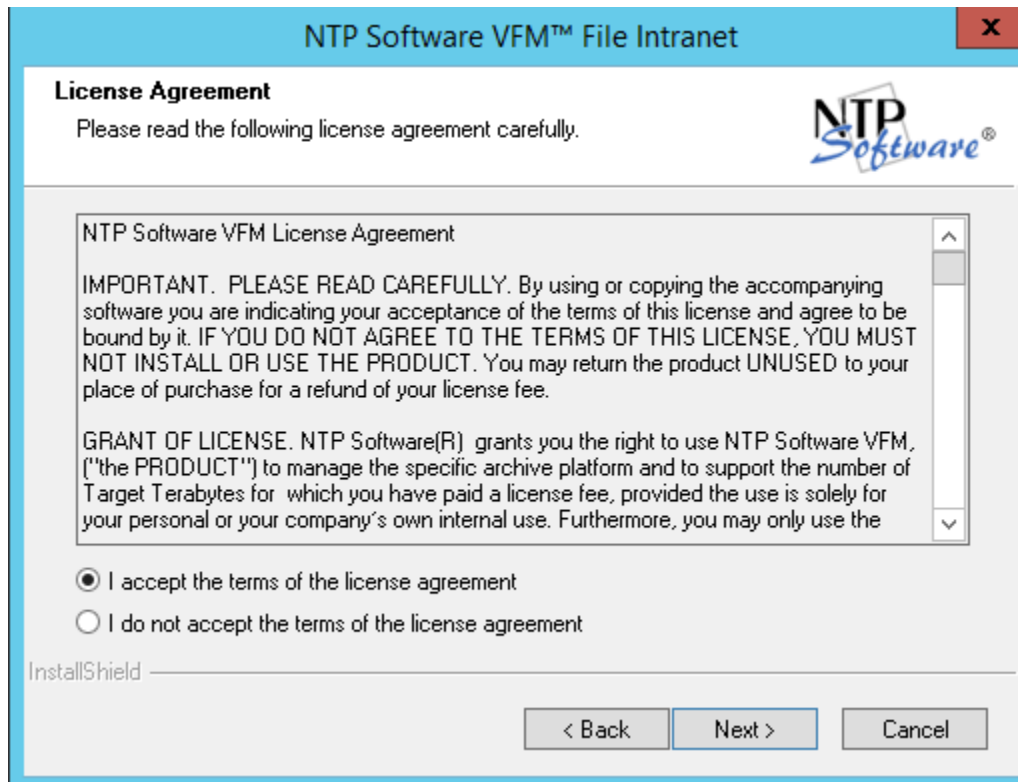

Installing DefendX Software Mobility File Intranet

To install DefendX Software Mobility File Intranet, perform the following steps:

1. Log on to your Windows machine by using an account with administrator privileges.
2. Launch the **Setup.exe** file.
3. When the **Welcome** dialog box appears, click **Next**.

4. In the **License Agreement** dialog box, read the end-user license agreement. If you agree to the terms, select **I accept the terms of the license agreement** and then click **Next**. If you do not accept the terms, click **Cancel** to exit the installation.

5. In the **Choose Destination Location** dialog box, click the **Browse** button to specify the destination location for the software installation. Click **Next**.

6. In the **Web Application** dialog box, specify the name of the website and virtual directory to gain access to the DefendX Software Mobility File Intranet, and click **Next**.

NTP Software VFM™ File Intranet

Web Application
Web Site and Virtual Directory Alias

Please specify the name of the web site and virtual directory to gain access to the NTP Software VFM File Intranet web site.

Virtual Directory

Use Default Web Site
 Existing Web Site Name

Web Site

InstallShield

< Back Next > Cancel

7. In the **DefendX Software Mobility Administration Web Site** dialog box, enter the http address of the DefendX Software Mobility administration web site and then click **Next**.

NTP Software VFM™ File Intranet

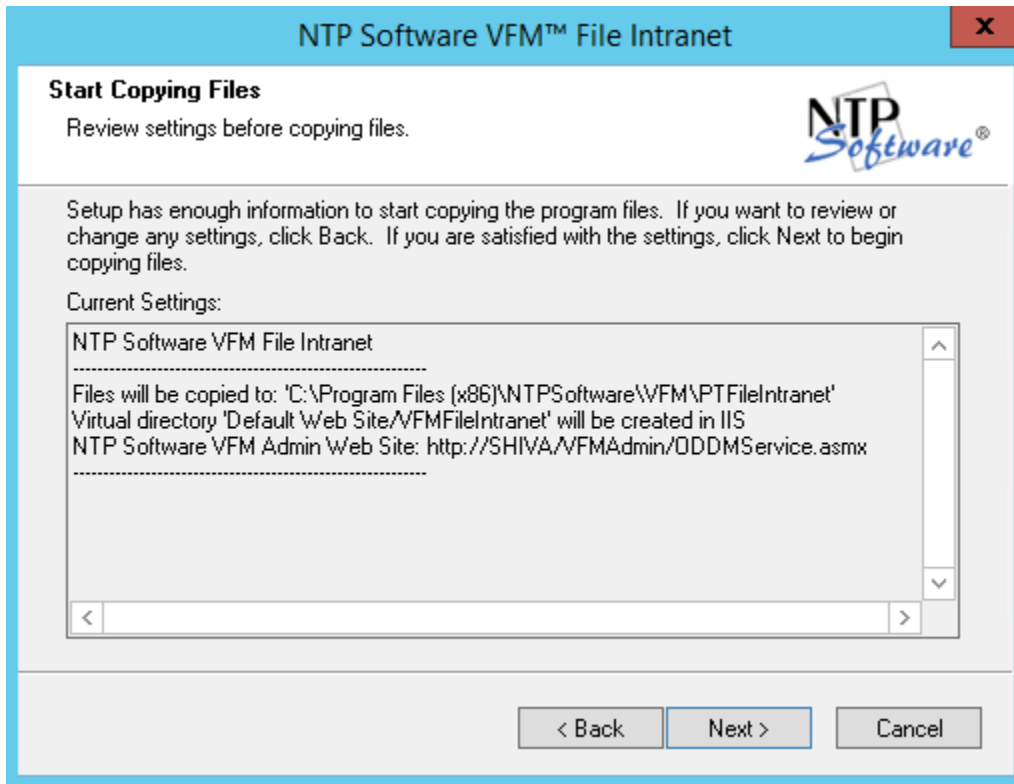

NTP Software VFM Administration Web Site

Please enter the VFM Administration Web Site address and click next.

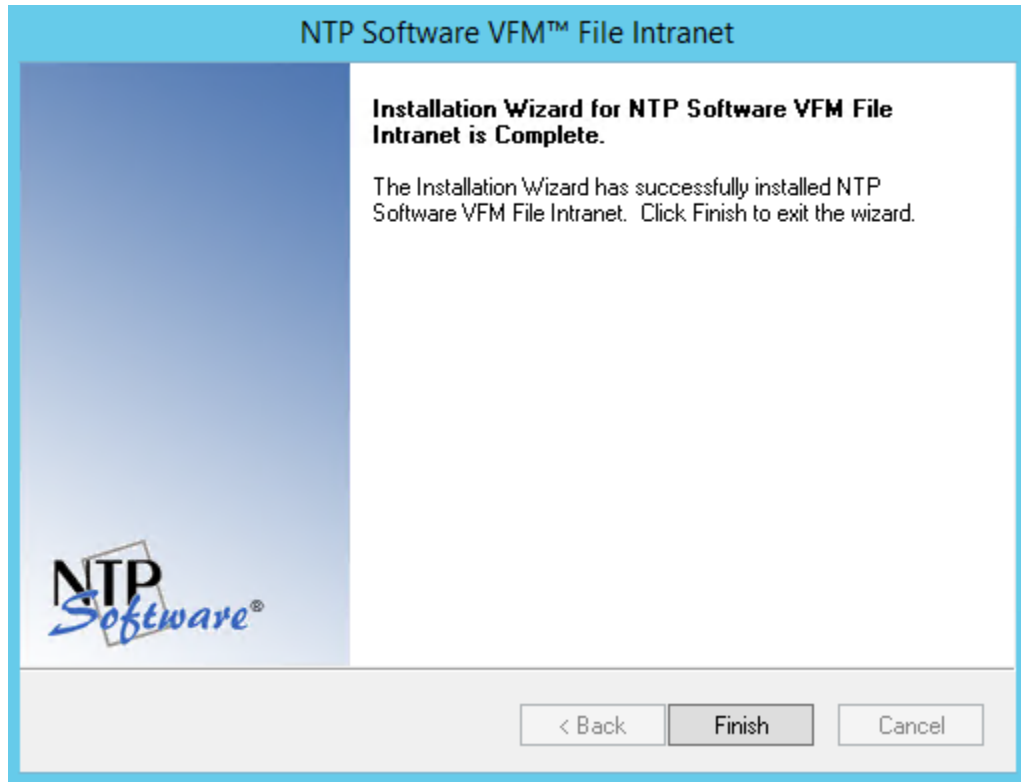

Enter the http address of the administration web site:

< Back Next > Cancel

8. In the **Start Copying Files** dialog box, review your settings. Click **Back** to make any changes; otherwise, click **Next** to begin copying the files.

9. When all files are copied, a final screen informs you that the installation is complete. Click **Finish** to complete the process.

About DefendX Software

DefendX Software helps organizations secure their critical business files and maximize the value of their enterprise file storage resources. From comprehensive intelligence, modeling, costing and chargeback to seamless file movement, protection and archiving, DefendX provides industry-leading capabilities to eliminate waste and align the value of files with the storage resources they consume. With DefendX, important file locations and the users who access them can be monitored to provide governance, protect against theft and enforce compliance policies. For more than 20 years, DefendX Software has been helping public and private sector customers around the world save money and eliminate risk every day.

DefendX Software Professional Services

DefendX Software's Professional Services offers consulting, training, and design services to help customers with their storage management challenges.
