Support for Windows Server 2016	4
Product installer.....	4
Auto Recall Stats	4
Mobility Assessment	4
Domain Storage	5
About DefendX Software	6
DefendX Software Professional Services	6
Legal & Contact Information	7

I. Upgrading and Backwards Compatibility

1. Before upgrading you should backup both Mobility databases.
2. The Mobility Admin, Access Portal, Recovery Portal and File Intranet components must all be upgraded to Mobility 7.2
3. During the upgrade of the Mobility Admin you must choose to upgrade both databases.
4. Customers that have a lot of task services may not want to or be able to upgrade all of them at once. Therefore, the Mobility 7.2 Admin is backwards compatible with 7.x/6.x/5.x Task Services and 7.x/6.x/5.x Core Tiering Engines.
5. Before upgrading a task service, you should stop the service first to prevent having to reboot the server.
6. When upgrading the task service or core tiering engine, the other, (i.e. both), must be upgraded.

II. Primary File Servers Supported

Mobility 7.2 Task Services support the following server types:

1. Microsoft Windows
 - Includes support for Windows Cluster
2. NetApp
 - 7-Mode
 - C-Mode
3. EMC
 - VNX
 - Unity
4. Generic
 - ☐ EMC Isilon
 - ☐ Hitachi HNAS
 - ☐ Other NAS servers

III. Secondary Storage

Mobility 7.2 supports the following secondary stores

1. CIFS
 - On NTFS file systems
 - On Strongbox LTFS
2. EMC Atmos
3. Microsoft Azure

4. Amazon S3
5. S3 Connector
 - EMC ECS (S3)
 - Data Domain (S3)
 - NetApp StorageGRID Webscale (S3)
 - Hitachi HCP (S3)
 - Other S3 Compatible (future untested S3 compatible clouds)
6. NFS
 - Amazon NFS gateway

IV. What's New in Mobility 7.2

Support for Windows Server 2016

- Starting with Windows Server 2016, Microsoft introduced driver signing that prevents unsigned drivers from running on your operating system. DefendX Mobility is officially signed and supported in the version.

Product installer

- DefendX Mobility now has the ability to install its services to remote servers via central administration portal.
- Refer to the latest **Installation Guide for Mobility Administrator Website** for the latest information.

Auto Recall Stats

- Statistics for files recalled by double clicking or “Automatic Recalls” including users with highest recall activity are now included on the home page of DefendX Mobility.

Mobility Assessment

- A new Assessment mode for the Core Tiering Engine is now available. This mode allows for a system wide scan of the environment to generate a report that aids decision making around what archive policies should be used to save the optimal amount of space.
- Refer to the latest **User Manual – DefendX Software Mobility Administration Website** on instructions and more information.

Domain Storage

- EMC Unity hosts will be supported natively by the Mobility Task Service for VNX starting with Mobility version 7.1.0.1002.
- Refer to the latest **Installation Guide for Mobility Domain Agent** for more information.

About DefendX Software

DefendX Software helps organizations secure their critical business files and maximize the value of their enterprise file storage resources. From comprehensive intelligence, modeling, costing and chargeback to seamless file movement, protection and archiving, DefendX provides industry-leading capabilities to eliminate waste and align the value of files with the storage resources they consume. With DefendX, important file locations and the users who access them can be monitored to provide governance, protect against theft and enforce compliance policies. For more than 20 years, DefendX Software has been helping public and private sector customers around the world save money and eliminate risk every day.

DefendX Software Professional Services

DefendX Software's Professional Services offers consulting, training, and design services to help customers with their storage management challenges. We have helped hundreds of customers to implement cost-effective solutions for managing their storage environments. Our services range from a simple assessment to in-depth financial analyses.

For further assistance in creating the most cost-effective Storage Management Infrastructure, please contact your DefendX Software Representative at 800-390-6937.
